# Injury event—external cause, code (ICD-10-AM 3rd edn) ANN{.N[N]}

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	External cause - admitted patient
<b>METEOR identifier:</b>	268945
<b>Registration status:</b>	<a href="#">Health!</a> , Superseded 28/06/2004
<b>Definition:</b>	The environmental event, circumstance or condition as the cause of injury, poisoning and other adverse effect, as represented by a code.

## Data element concept attributes

### Identifying and definitional attributes

<b>Data element concept:</b>	<a href="#">Injury event—external cause</a>
<b>METEOR identifier:</b>	269426
<b>Registration status:</b>	<a href="#">Tasmanian Health</a> , Standard 02/09/2016 <a href="#">Health!</a> , Superseded 20/10/2021
<b>Definition:</b>	Environmental event, circumstance or condition as the cause of injury, poisoning and other adverse effect.
<b>Context:</b>	Injury surveillance
<b>Object class:</b>	<a href="#">Injury event</a>
<b>Property:</b>	<a href="#">External cause</a>

## Value domain attributes

### Identifying and definitional attributes

<b>Value domain:</b>	<a href="#">External cause code (ICD-10-AM 3rd edn) ANN{.N[N]}</a>
<b>METEOR identifier:</b>	270579
<b>Registration status:</b>	<a href="#">Health!</a> , Superseded 28/06/2004
<b>Definition:</b>	The ICD-10-AM (3rd edition) code set representing external cause of injury, poisoning or other adverse effect.

## Representational attributes

<b>Classification scheme:</b>	<a href="#">International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification 3rd edition</a>
<b>Representation class:</b>	Code
<b>Data type:</b>	String
<b>Format:</b>	ANN{.N[N]}
<b>Maximum character length:</b>	6

## Source and reference attributes

<b>Origin:</b>	International Classification of Diseases - Tenth Revision - Australian Modification (3rd Edition 2002) National Centre for Classification in Health, Sydney

## Data element attributes

### Collection and usage attributes

**Guide for use:** This code must be used in conjunction with an injury or poisoning code and can be used with other disease codes. Admitted patients should be coded to the complete ICD-10-AM classification.

An external cause code should be sequenced following the related injury or poisoning code, or following the group of codes, if more than one injury or condition has resulted from this external cause. Provision should be made to record more than one external cause if appropriate. External cause codes in the range W00 to Y34, except Y06 and Y07 must be accompanied by a place of occurrence code.

External cause codes V01 to Y34 must be accompanied by an activity code.

**Comments:** Enables categorisation of injury and poisoning according to factors important for injury control. This information is necessary for defining and monitoring injury control targets, injury costing and identifying cases for in-depth research. It is also used as a quality of care indicator of adverse patient outcomes.

An extended activity code is being developed in consultation with the National Injury Surveillance Unit, Flinders University, Adelaide.
