Birth plurality

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	269039
Registration status:	Health!, Superseded 02/08/2017 Indigenous, Superseded 22/10/2018
Definition:	An indicator of multiple birth, showing the total number of births resulting from a single pregnancy.
Context:	National Minimum Data Set (NMDS) Perinatal: Multiple pregnancy increases the risk of complications during pregnancy, labour and delivery and is associated with higher risk of perinatal morbidity and mortality. Data Set Specification (DSS) Health Care Client Identification: While this piece of information is normally recorded for multiple births against the mother's record, if the health care client volunteers the information, it should be recorded.
Property group:	Birth event
