Income unit—income unit type

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 269600

Registration status: [Community Services \(retired\)](#), Standard 31/08/2007
[Housing assistance](#), Standard 30/08/2017

Definition: The description of the income unit a person belongs to.

Context: This is the standard statistical unit for analyses of economic well being, and can be an important measure in assessing the needs and circumstances of individuals and families. Income units are essential to calculate potential rent assistance available to households if they were in the private rental market. Income units may also be used as means of calculating the number of potential households needing assistance.

Object Class attributes

Identifying and definitional attributes

Object class: [Income unit](#)

Definition: One person or a group of related persons within a [household](#), whose command over income is shared, or any person living in a non private dwelling who is in receipt of personal income.

Context: Income units are restricted to relationships of marriage (registered or de facto) and of parent/[dependant](#), who usually reside in the same household. This means that an income unit can be defined as:

- a married couple or sole parent, and dependent children only
- a married couple only with no dependent children present
- a person who is not related to any other household member either by marriage or by the parent/dependant relationship.

This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and families.
