# Person—geographic location

### Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 269753

Registration status: Community Services (retired), Standard 01/03/2005

Tasmanian Health, Standard 30/04/2021

**Definition:** The geographical location of a person.

**Context:** This is used in analysis of geographical patterns of service distribution and

utilisation.

## **Object Class attributes**

### Identifying and definitional attributes

Object class: Person

**Definition:** A human being.

## Collection and usage attributes

**Comments:** Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human

being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are

not exclusively male or female.
