## Elective surgery waiting list episode—clinical urgency, code N

## Identifying and definitional attributes

Metadata item type: Data Element

Short name: Clinical urgency

METEOR identifier: 270008

**Registration status:** <u>Health!</u>, Superseded 12/06/2015

National Health Performance Authority (retired), Retired 01/07/2016

**Definition:** A clinical assessment of the urgency with which a patient requires elective hospital

care, as represented by a code.

Data Element Concept: Elective surgery waiting list episode—clinical urgency

Value Domain: <u>Clinical urgency code N</u>

#### Value domain attributes

### Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

	Value	Meaning
Permissible values:	1	Admission within 30 days desirable for a condition that has the potential to deteriorate quickly to the point that it may become an emergency
	2	Admission within 90 days desirable for a condition causing some pain, dysfunction or disability but which is not likely to deteriorate quickly or become an emergency
	3	Admission at some time in the future acceptable for a condition causing minimal or no pain, dysfunction or disability, which is unlikely to deteriorate quickly and which does not have the potential to become an emergency

#### Data element attributes

### Collection and usage attributes

Guide for use: The classification employs a system of urgency categorisation based on factors

such as the degree of pain, dysfunction and disability caused by the condition and its potential to deteriorate quickly into an emergency. All patients ready for care must be assigned to one of the urgency categories, regardless of how long it is

estimated they will need to wait for surgery.

**Comments:** A patient's classification may change if he or she undergoes **clinical review** during

the waiting period. The need for clinical review varies with the patient's condition and is therefore at the discretion of the treating clinician. The waiting list information system should be able to record dates when the classification is changed

(metadata item Elective care waiting list episode—category reassignment date,

DDMMYYYY).

#### Source and reference attributes

Origin: National Health Data Committee
