## Representational attributes

<b>Representation class:</b>	Date
------------------------------	------

**Data type:** Date/Time  
**Format:** DDMMYYYY  
**Maximum character length:** 8

## Data element attributes

### Collection and usage attributes

**Comments:** There may be variations amongst jurisdictions with respect to the recording of separation date. This most often occurs for patients who are statistically separated after a period of leave (and who do not return for further hospital care). In this case, some jurisdictions may record the separation date as the date of statistical [separation](#) (and record intervening days as leave days) while other jurisdictions may retrospectively separate patients on the first day of leave. Despite the variations in recording of separation date for this group of patients, the current practices provide for the accurate recording of length of stay.
