Episode of admitted patient care (newborn)—number of qualified days, total N[NNNN]

Exported from METEOR (AIHW's Metadata Online Registry)

Episode of admitted patient care (newborn)—number of qualified days, total N[NNNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of qualified days for newborns
METEOR identifier:	270033
Registration status:	Health!, Superseded 18/12/2019
Definition:	The number of qualified newborn days occurring within a newborn episode of care.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Episode of admitted patient care (newborn)—number of qualified days
METEOR identifier:	269504
Registration status:	Health!, Standard 01/03/2005 Tasmanian Health, Standard 29/04/2021
Definition:	The number of qualified newborn days occurring within a newborn episode of care.
Context:	Admitted patient care - newborn episodes of care only.
Object class:	Episode of admitted patient care
Property:	Number of qualified days

Value domain attributes

Identifying and definitional attributes

Value domain:	Total days N[NNNN]
METEOR identifier:	270643
Registration status:	Health!, Standard 01/03/2005 Tasmanian Health, Standard 08/12/2016
Definition:	Total number of days.

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNN]
Maximum character length:	5
Unit of measure:	Day

Data element attributes

Collection and usage attributes

Guide for use:	The rules for calculating the number of qualified newborn days are outlined below. The number of qualified days is calculated with reference to the [Episode of admitted patient care—admission date, DDMMYYYY](#), [Episode of admitted patient care—separation date, DDMMYYYY](#) and any [Episode of admitted patient care (newborn)—date of change to qualification status, DDMMYYYY](#):

- the date of admission is counted if the patient was qualified at the end of the day
- the date of change to qualification status is counted if the patient was qualified at the end of the day
- the date of separation is not counted, even if the patient was qualified on that day
- the normal rules for calculation of patient days apply, for example in relation to leave and same day patients

The length of stay for a newborn episode of care is equal to the sum of the qualified and unqualified days.
