Episode of admitted patient care—length of stay (special/neonatal intensive care), total days N[NN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of days in special/neonatal intensive care
METEOR identifier:	270057
Registration status:	HealthI , Standard 01/03/2005
Definition:	The total number of days spent by a neonate in a special care or neonatal intensive care nursery (in the hospital of birth).
Data Element Concept:	Episode of admitted patient care—length of stay (special/neonatal intensive care)
Value Domain:	Total days N[NN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NN]
Maximum character length:	3
Unit of measure:	Day

Data element attributes

Collection and usage attributes

Guide for use:	The number of days is calculated from the date the baby left the special/neonatal intensive care unit minus the date the baby was admitted to the special/neonatal intensive care unit.
Collection methods:	This item is to be completed if baby has been treated in an intensive care unit or a special care nursery (SCN).
Comments:	<p>An indicator of the requirements for hospital care of high-risk babies in specialised nurseries that add to costs because of extra staffing and facilities.</p> <p>SCN are staffed and equipped to provide a full range of neonatal services for the majority of complicated neonatal problems, including short-term assisted ventilation and intravenous therapy.</p> <p>Neonatal intensive care nurseries (NICN) are staffed and equipped to treat critically ill newborn babies including those requiring prolonged assisted respiratory support, intravenous therapy, and alimentation and treatment of serious infections. Full supportive services are readily available throughout the hospital. These NICN also provide consultative services to other hospitals.</p>
