Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NN]
Maximum character length:	3
Unit of measure:	Service contact

Data element attributes

Collection and usage attributes

Guide for use:	<p>This metadata item is a count of service contacts related to treatment that are recorded on a client record. Any client contact that does not constitute part of a treatment should not be considered a service contact. Contact with the client for administrative purposes, such as arranging an appointment, should not be included.</p> <p>This item is not collected for residential clients.</p> <p>Where multiple service provider staff have contact with the client at the same time, on the same occasion of service, the contact is counted only once.</p> <p>When multiple service contacts are recorded on the same day, each independent contact should be counted separately.</p>
Collection methods:	To be collated at the close of a treatment episode.
Comments:	This metadata item provides a measure of the frequency of client contact and service utilisation within a treatment episode.
