# Collection and usage attributes

**Guide for use:** Emergency patients and outpatients are persons who receive non-admitted care.

Individual non-admitted care is care provided to a person who receives direct care within the <u>emergency department</u> or other designated clinics within the hospital and who is not formally admitted at the time when the care is provided. A person who first contacts the hospital and receives non-admitted care, for example through the emergency department, and is subsequently admitted should have both

components of care enumerated separately.

**Comments:** A group is defined as two or more patients receiving a service together where all

individuals are not members of the same family. Family services are to be treated

as occasions of service to an individual.
