Data Element Concept:	Establishment—number of group session occasions of service for non-admitted patients
Value Domain:	Total occasions of service N[NNNNNN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNNNN]
Maximum character length:	7
Unit of measure:	Occasion of service

Data element attributes

Collection and usage attributes

Guide for use:	Emergency patients and outpatients are persons who receive non-admitted care. Group session non-admitted care is care provided to persons who receive direct care within the **emergency department** or other designated clinics within the hospital and who are not formally admitted at the time when the care is provided. A person who first contacts the hospital and receives non-admitted care, for example through the emergency department, and is subsequently admitted should have both components of care enumerated separately.
