Person—telephone number, text X[X(39)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Telephone number
METEOR identifier:	270266
Registration status:	Health!, Standard 01/03/2005 Community Services (retired) , Superseded 06/02/2012
Definition:	The person's contact telephone number, as represented by text.
Data Element Concept:	Person—telephone number
Value Domain:	Text X[X(39)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	X[X(39)]
Maximum character length:	40

Value	Meaning
-------	---------

Permissible values:

Data element attributes

Collection and usage attributes

Guide for use:	More than one phone number may be recorded as required. Each phone number should have an appropriate telephone number type code assigned. Record the full phone number (including any prefixes) with no punctuation (hyphens or brackets).
Collection methods:	Prefix plus telephone number: Record the prefix plus telephone number. The default should be the local prefix with an ability to overtype with a different prefix. For example, 08 8226 6000 or 0417 123456. Punctuation: Do not record punctuation. For example, (08) 8226 6000 or 08-8226 6000 would not be correct. Unknown: Leave the field blank.
Comments:	Concerned with the use of person identification data. For organisations that create, use or maintain records on people. Organisations should use this standard, where appropriate, for collecting data when registering people. The positive and unique identification of people is a critical event in service delivery, with direct implications for the safety and quality of care delivered by health and community services.
