Household—household type, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Household type
METEOR identifier:	270394
Registration status:	Community Services (retired) , Superseded 27/04/2007
Definition:	A categorisation of a household based on the presence or absence of family members, as represented by a code.
Data Element Concept:	Household—household type
Value Domain:	Household type code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Family household with only family members present
	2	Family household with non-family members present
	3	Non-family household
	4	Not classifiable
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:

The classification is based on the ABS 2 level hierarchy. Only level 1 of this classification has been adopted for this metadata item. It differs from the ABS classification in that it seeks to determine whether there are non-family persons co-resident with the person of concern. Care should be taken in making comparisons with the ABS data for Household type.

If individual agencies need to classify household types at a lower level of detail, they should ensure that the more detailed ABS classification is used. The lower levels in the classification cover detail on the number of families or the number of household members. Thus, household type is allocated dependent on the basis of the number of families and whether unrelated household members are present (if it is a family household), or the number of household members if it is a non-family household.

It should be noted that only usual residents of a household are considered when describing and categorising households by Household type. Since households are differentiated in terms of families, and visitors to a household are excluded from family coding, the identification of usual residence is essential to determine the household type.

CODE 4 Not Classifiable

Operationally, all households must contain at least one member 15 years of age or older. Any household consisting only of a person or persons all under 15 years of age is coded to 'Not classifiable'. This approach is consistent with that used in the family type classification, in which a family is likewise not defined unless it consists of at least one member aged 15 years or older.

CODE 9 Not stated/inadequately described

Is not for use on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.
