Guide For Use: More than one procedure may be recorded.
Record only those codes that apply.
Record all codes that apply.
When read in conjunction with Clinical procedure timing status, this data element provides information on the procedure(s) provided to a patient prior to or during admission.
When read in conjunction with Acute coronary syndrome stratum, codes 01 to 10 of this data element provide information for risk stratification.

Verification Rules: Codes 88 and 99 cannot be used in multiple entries.

Collection Methods: At admission, each procedure performed for the treatment of acute coronary syndrome prior to that admission should be recorded in conjunction with the data element Clinical procedure timing status (i.e. code 1).
Each procedure performed for the treatment of acute coronary syndrome during the episode of admitted patient care should also be recorded in conjunction with the data element Clinical procedure timing status (i.e. code 2).
