Admpat   Use External Causes of Morbidity and Mortality
           Place of Occurrence codes from the current edition
           of ICD 10 AM. Used with all ICD 10 AM external
           cause codes and assigned according to the
           Australian Coding Standards.

Guide For Use: Non-admitted patients:
           To be used for injury surveillance purposes for non-admitted
           patients when it is not possible to use ICD-10-AM codes. Select
           the code which best characterises the type of place where the
           person was situated when the injury occurred on the basis of the
           information available at the time it is recorded. If two or more
           categories are judged to be equally appropriate, select the one
           that comes first in the code list.

Verification Rules: Admitted patients:
           To be used with ICD-10-AM external cause codes.
