## Person—functional stress test element, code N

## Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Functional stress test element

METEOR identifier: 285097

Registration status: Health!, Superseded 01/10/2008

**Definition:** The element included in an electrocardiogram stress test, as represented by a

code.

 Data Element Concept:
 Person—functional stress test element

 Value Domain:
 Functional stress test element code N

### Value domain attributes

## Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

ValueMeaningPermissible values:1ECG monitoring2Echocardiography

3 Radionuclide (perfusion) imaging (e.g. Thallium,

Sestamibi)

**Supplementary values:** 9 Not stated/inadequately described

#### Source and reference attributes

**Submitting organisation:** Australian Institute of Health and Welfare

#### Data element attributes

## Collection and usage attributes

**Guide for use:** More than one code may be recorded (code 9 is excluded from multiple coding).

#### Source and reference attributes

**Submitting organisation:** Acute coronary syndrome data working group

Steward: The National Heart Foundation of Australia and The Cardiac Society of Australia

and New Zealand

#### Relational attributes
