# **Dwelling—number of bedrooms**

### Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 302510

Registration status: Housing assistance, Standard 10/02/2006

Definition: The number of bedrooms in each dwelling.

**Context:** Total bedrooms used in measures of housing need.

## Object Class attributes

### Identifying and definitional attributes

Object class: <u>Dwelling</u>

**Definition:** A structure or a discrete space within a structure intended for people to live in or

where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.

**Context:** Dwellings are the main counting unit in the housing sector. Dwellings are reported

for a variety of purposes including number of untenantable or tenantable, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including head-leased stock from **private** and **government** sources. A dwelling includes a **boarding house building** and

boarding house units.

Specialisation of: Environmental factors

#### Collection and usage attributes

Guide for use: Boarding house rooms or beds are not identified as separate dwellings unless

they are self-contained. Self-contained rooms are therefore defined as units and

are counted as a separate dwelling.

For the public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting

the number of dwellings.

#### Source and reference attributes

**Submitting organisation:** National Housing Data Development Committee

**Origin:** Australian Bureau of Statistics: 2001 Census Data Dictionary (Cat. no. 2901.0).
