Establishment—number of individual session occasions of service for non-admitted patients

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	313847
Registration status:	HealthI , Standard 01/03/2005
Definition:	The number of non-admitted occasions of service for those treated as individual patients provided by an establishment.
Context:	Required to adequately describe the services provided to non-admitted patients.

Object Class attributes

Identifying and definitional attributes

Object class:	Establishment
Definition:	Institutions, organisations or the community from which health services are provided. The term establishment covers conventional health establishments and also organisations which may provide services in the community.
Specialisation of:	Organisation

Source and reference attributes

Origin:	National Health Data Committee
----------------	--------------------------------

Property attributes

Identifying and definitional attributes

Property:	Number of individual session occasions of service for non-admitted patients
Definition:	A count of the non-admitted occasions of service provided as an individual session.
Property group:	Performance indicators

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--

Data element concept attributes

Collection and usage attributes

Comments:	<p>Family services are to be treated as occasions of service to an individual. A group is defined as two or more patients receiving a service together where all individuals are not members of the same family.</p> <p>In general, establishments other than acute hospitals provide a much more limited range of services for non-admitted patients and outreach/community patients/clients. Therefore, disaggregation by type of non-admitted patient care is not relevant to alcohol and drug hospitals.</p>
------------------	--
