Format:	hhmm
Maximum character length:	4

Source and reference attributes

Reference documents:	ISO 8601:2000 : Data elements and interchange formats - Information interchange - Representation of dates and times

Data element attributes

Collection and usage attributes

Guide for use:	Acute coronary syndrome symptoms may include:

- tightness, pressure, heaviness, fullness or squeezing in the chest which may spread to the neck and throat, jaw, shoulders, the back, upper abdomen, either or both arms and even into the wrists and hands
- dyspnoea, nausea/vomiting, cold sweat or syncope.

Seeking medical attention could include the person presenting to their GP who then refers them to hospital or the person presenting directly to hospital (via ambulance or own form of transport).

If the person is already a patient at the hospital for another reason then the time recorded would be when they advised hospital staff of their symptoms.

Collection methods:	Record the time of onset of the most significant acute coronary syndrome symptom/s that prompted the person to seek medical attention (from the person's perspective).
