<b>Maximum character length:</b>	8

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	<p>The reserve placement date must be the same as or after the date the health-care incident occurred.</p> <p>The reserve may be adjusted during the lifetime of a claim. However, the date(s) when the reserve was adjusted should not be reported.</p> <p>This data element should be used in conjunction with the data element: <i>Date—accuracy indicator, code AAA</i> to flag whether each component in the date is accurate, estimated or unknown.</p>
<b>Comments:</b>	<p>This date is of particular significance in the context of the Medical Indemnity National Collection (MINC) as the placing of a reserve against a matter indicates when it was considered likely to materialise in a medical indemnity claim and so is required to have occurred for a claim to be reported to the MINC.</p>
