Format:	DDMMYYYY
Maximum character length:	8

Data element attributes

Collection and usage attributes

Collection methods:	A rehabilitation plan is usually established at the first case conference after the patient's admission.
Comments:	The establishment of a rehabilitation plan with regular review is necessary for effective patient rehabilitation. A rehabilitation plan comprises a series of documented and agreed initiatives/treatment (specifying program goals and time frames), which has been established through multi-disciplinary consultation and consultation with the patient.
