Person—type of substance used illicitly, drug of concern (ASCDC 2011 extended) code NNNN

Exported from METEOR (AIHW's Metadata Online Registry)

Person—type of substance used illicitly, drug of concern (ASCDC 2011 extended) code NNNN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Type of substance used illicitly
METEOR identifier:	365401
Registration status:	Health!, Standard 25/08/2011
	Community Services (retired), Standard 06/02/2012
Definition:	The type of substance used illicitly by a person, as represented by a code.
Data Element Concept:	Person—type of substance used illicitly
Value Domain:	Drug of concern (ASCDC 2011 extended) code NNNN

Value domain attributes

Representational attributes

Classification scheme:	Australian Standard Classification of Drugs of Concern 2011
Representation class:	Code
Data type:	String
Format:	NNNN
Maximum character length:	4

	Value	Meaning
Supplementary values:	0005	Opioid analgesics not further defined
	0006	Psychostimulants not further defined

Collection and usage attributes

Guide for use:	The Australian Standard Classification of Drugs of Concern (ASCDC) provides a number of supplementary codes that have specific uses and these are detailed within the ASCDC, e.g. 0000 = inadequately described.
	Other supplementary codes that are not already specified in the ASCDC may be used in National Minimum Data Sets (NMDS) when required. In the Alcohol and other drug treatment service NMDS, two additional supplementary codes have been created which enable a finer level of detail to be captured:
	CODE 0005 Opioid analgesics not further defined
	This code is to be used when it is known that the client's principal drug of concern is an opioid but the specific opioid used is not known. The existing code 1000 combines opioid analgesics and non-opioid analgesics together into Analgesics nfd and the finer level of detail, although known, is lost.
	CODE 0006 Psychostimulants not further defined
	This code is to be used when it is known that the client's principal drug of concern is a psychostimulant but not which type. The existing code 3000 combines stimulants and hallucinogens together into Stimulants and hallucinogens nfd and the finer level of detail, although known, is lost.
	Psychostimulants refer to the types of drugs that would normally be coded to 3100-3199, 3300-3399 and 3400-3499 categories plus 3903 and 3905.

Data element attributes

Collection and usage attributes

Guide for use: This data element is used in conjunction with the data element: Person—substance used illicitly indicator, prisoner health yes/no/unknown code N to provide information on the type of substances a person has used illicitly.
