Pregnancy—estimated duration

Identifying and definitional attributes

Metadata item type:	Data Element Concept
Synonymous names:	Pregnancy—estimated gestation
METEOR identifier:	379595
Registration status:	WA Health , Standard 04/03/2014 Health! , Superseded 12/12/2018 Indigenous , Superseded 02/04/2019 Tasmanian Health , Superseded 03/07/2020
Definition:	The estimated duration of a pregnancy on a specified day.

Object Class attributes

Identifying and definitional attributes

Object class:	Pregnancy
METEOR identifier:	268966
Registration status:	Health! , Standard 01/03/2005 WA Health , Standard 06/03/2014 Tasmanian Health , Standard 20/12/2016 Indigenous , Standard 02/04/2019
Definition:	The period during which a woman carries a developing fetus, normally in the uterus. Pregnancy lasts for approximately 266 days, from conception until the baby is born, or 280 days from the first day of the last menstrual period. During pregnancy menstruation is absent, there may be a great increase in appetite, and the breasts increase in size; the woman may also experience morning sickness. These and other changes brought about by a hormone (progesterone) produced at first by the ovary and later by the placenta. Definite evidence of pregnancy is provided by various pregnancy tests, by the detection of the heartbeat of the fetus, and by ultrasound.
Specialisation of:	Life event

Data element concept attributes

Collection and usage attributes

Guide for use:

The duration of a pregnancy on the day of the first antenatal visit has the same value as the best estimate of gestational age for the fetus or baby. There may be one or more revisions of pregnancy duration after the first antenatal visit if a better estimate of gestational age of the fetus or baby becomes available. Revised estimates are not usually applied retrospectively in health records. The best estimate of pregnancy duration is used to record the gestation at later antenatal visits and to assign gestational age to the baby recorded at the time of birth.

If gestational age has been revised, a similar revision will need to be applied to earlier recorded estimates of pregnancy duration. Alternatively the pregnancy duration on a specified day can be calculated from the gestational age on the day of the baby at birth.
