Registered chiropractic labour force DSS

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	384097
Registration status:	Health! , Standard 10/12/2009
DSS type:	Data Set Specification (DSS)
Scope:	All chiropractors listed with the Australian Health Practitioner Regulation Agency during the reference period. Chiropractors included in this DSS may be currently registered or they may be listed but not currently registered.

Collection and usage attributes

Statistical unit:	<p>The statistical unit for this data set is the Registered chiropractor.</p> <p>A Registered chiropractor refers to a person who is currently registered, or who has been registered, with the Australian Health Practitioner Regulation Agency as a chiropractor at any time during the reference period.</p>
Guide for use:	<p>This DSS is a component of the Registered health labour force DSS. The Registered health labour force DSS contains profession-specific DSS for health professions listed with the Australian Health Practitioner Regulation Agency</p> <p>Note that a health professional may be qualified and registered in more than one profession.</p> <p>Within each profession-specific DSS there are data clusters that apply to health professionals employed in the profession. Main job data clusters apply to all health professionals employed in the profession. Second job data clusters relate only to those health professionals employed in more than one job in the profession. All other workforce data elements in the DSS apply to all jobs held in the profession.</p>
Collection methods:	<p><i>National reporting arrangements</i></p> <p>Registered health professionals provide data to the Australian Health Practitioner Regulation Agency as part of their initial registration and registration renewal processes. The data includes information required for registration purposes and additional workforce data.</p> <p>The Australian Health Practitioner Regulation Agency provides an extract of these data to the Australian Institute of Health and Welfare (AIHW) for the purposes of national collation and reporting. The data in this DSS comprises demographic, registration and work characteristics information.</p> <p><i>Periods for which data are collected and collated</i></p> <p>Data are collated annually. The period is determined by the national registration renewal period for chiropractors.</p> <p><i>Collection of workforce data</i></p> <p>Health professionals are asked to report data for their main job, second job, and all jobs in the profession. Some health professionals may hold more than two jobs in the profession therefore data reported for main and second jobs may be less than data reported for all jobs in the profession.</p>
