Service provider organisation—organisation identifier (NDA service type outlet), XX[X(12)]

Exported from METEOR (AIHW's Metadata Online Registry)

Service provider organisation—organisation identifier (NDA service type outlet), XX[X(12)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Service type outlet identifier (NDA)
Synonymous names:	Service type outlet ID
METEOR identifier:	386479
Registration status:	Community Services (retired), Superseded 10/04/2013 [Non Dictionary]
Definition:	A unique identifier assigned to each NDA service type outlet.
Data Element Concept:	Service provider organisation—organisation identifier
Value Domain:	Identifier XX[X(12)]

Value domain attributes

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	XX[X(12)]
Maximum character length:	14

Data element attributes

Collection and usage attributes

Guide for use:	This data element is reported by funding departments in relation to all service type outlets.
	The *Service type outlet identifier (NDA)* must include information to identify both the service type outlet and its funded agency - thus it is unique within the jurisdiction, and incorporates the *Funded agency identifier (NDA)*.
	The funding department allocates a unique *Service type outlet identifier (NDA)* to each separate service type outlet.
Collection methods:	The identifier can be numeric or alphanumeric but should not identify the service type outlet by name.
	The ID number must include information to identify both the service type outlet and its funded agency-thus it is unique within the jurisdiction. This means that the service type outlet ID is generally longer than the funded agency ID.
Comments:	Service type outlets deliver a particular NDA service type at or from a discrete location. A unique identification system for service type outlets enables information to be provided about each different service type outlet under the NDA. Identifying each service type outlet also enables information to be presented about the number of service users accessing each service type. This information can then be used for future service planning at the state/territory level.

Source and reference attributes

Submitting organisation:	DS NMDS Network.
