Cancer staging—cancer staging scheme source edition number, code N[N]

Exported from METEOR (AIHW's Metadata Online Registry)

Cancer staging—cancer staging scheme source edition number, code N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Cancer staging scheme source edition number
METEOR identifier:	393398
Registration status:	Health!, Standard 07/12/2011
Definition:	The edition number of the cancer staging scheme used to determine the extent or stage of the cancer, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Cancer staging—cancer staging scheme source edition number
METEOR identifier:	394930
Registration status:	Health!, Standard 07/12/2011
Definition:	The edition number of the cancer staging scheme used to determine the extent or stage of the cancer
Object class:	Cancer staging
Property:	Cancer staging scheme source edition number

Value domain attributes

Identifying and definitional attributes

Value domain:	Cancer staging scheme source edition number N[N]
METEOR identifier:	394393
Registration status:	Health!, Standard 07/12/2011
Definition:	The edition number of the reference used for the purpose of staging a cancer.

Representational attributes

Representation class:	Text	
Data type:	Number	
Format:	N[N]	
Maximum character length:	2	
	Value	**Meaning**
Supplementary values:	97	Not applicable
	98	Unknown
	99	Not stated/inadequately described

Collection and usage attributes

Guide for use:	Record the edition number, valid entries are from 1 to 96.
	CODE 97 Not applicable
	To be used for cases that do not have a recommended staging scheme or when the staging scheme source does not have edition number.

Source and reference attributes

| **Submitting organisation:** | Cancer Australia |

Data element attributes

Collection and usage attributes

| **Guide for use:** | Record for any staging classification system that has an edition number. For example, record the edition number when the TNM Classification of Malignant Tumours (International Union Against Cancer (UICC)) or the American Joint Committee on Cancer (AJCC) Cancer Staging Manual is used for the purpose of staging the cancer. |
| **Comments:** | Collected to identify the edition number of the staging scheme source. Cancer stage is an important determinant of treatment and prognosis, and is used to evaluate new treatments and analyse outcomes. Survival analysis is adjusted by stage at diagnosis and distribution of cancer cases by type and stage. |

Source and reference attributes
