Cancer treatment—chemotherapy completion date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Chemotherapy completion date
METEOR identifier:	393552
Registration status:	Health! , Superseded 08/05/2014
Definition:	The completion date of chemotherapy administered during the initial course of treatment for cancer, expressed as DDMMYYYY.
Data Element Concept:	Cancer treatment—chemotherapy completion date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Data element attributes

Collection and usage attributes

Guide for use:	<p>Chemotherapy is cancer treatment that achieves its antitumour effect through the use of antineoplastic drugs that inhibit the reproduction of cancer cells by interfering with DNA synthesis and mitosis.</p> <p>The completion date of chemotherapy is the date the last dose was administered during the initial course of treatment. The initial course of treatment includes all treatments administered to the patient from diagnosis and before disease progression or recurrence.</p> <p>The completion date of chemotherapy is recorded regardless of whether the course of treatment is completed as intended, and regardless of the intent or timing of the chemotherapy.</p> <p>Multiple entries are not permitted.</p> <p>Dates relating to targeted therapies using a chemotherapy agent are included. Targeted therapies are treatments that use drugs or other substances to identify and attack specific cancer cells.</p> <p>Dates of surgery, radiotherapy and other systemic treatments are collected as separate items. However, if a patient receives treatment with a protocol that includes different types of systemic therapy agents, for example, a chemotherapy agent and a hormone therapy agent, record the completion date of treatment in both relevant data items.</p>
Collection methods:	The information should be obtained from the patient's medical record.
Comments:	Collecting the start and finish dates for treatment modalities will enable an estimate of treatment duration.
