National Disability Agreement: c-Proportion of the potential population accessing disability services, 2010

Exported from METEOR (AIHW's Metadata Online Registry)

National Disability Agreement: c-Proportion of the potential population accessing disability services, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Common name:	Potential population accessing disability services, 2010.
Short name:	Proportion of the potential population accessing disability services, 2010
METEOR identifier:	393880
Registration status:	Community Services (retired), Superseded 15/12/2011
Description:	Use of specialist disability service.
Indicator set:	National Disability Agreement (2010) Community Services (retired), Superseded 15/12/2011
Outcome area:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible Community Services (retired), Standard 23/07/2010 Disability, Standard 13/08/2015
Data quality statement:	National Disability Agreement: c-Proportion of the population accessing disability services, 2010 QS Community Services (retired), Superseded 15/12/2011

Collection and usage attributes

Population group age from:	0
Population group age to:	64
Computation description:	Performance Indicators for disability services funded by the Australian Government (employment services only) are restricted to the age range 15–64 years.
Computation:	R/N x 100 where R = number of service users aged 0–64 years in the DS NMDS during the reporting period and N = estimated potential population on 30 June at the start of the reporting period.
Numerator:	Number of users of specialist disability services aged 0–64 years in the reporting period.

Denominator: Estimated potential population for specialist disability services on 30 June at start of reporting period.

Although the definition of potential population is under review by the National Disability Data Network, theNational Disability Information Management Group (NDIMG)agreed to adopt the conventional definition until the review completes. That is, people aged under 65 years with profound or severe core activity limitation will be used for the baseline CRC report.

Potential population will be calculated by applying age-sex-specific rates of severe/profound core activity limitation (from the Survey of Disability, Ageing and Carers (SDAC)2003) to the 30 June 2007Estimated Residential Population by state/territory by age group by sex. No Indigenous weight or scaling factor is used. National level age-sex rates from SDAC 2003, rather than state/territoryage- sex rates are used due to the high sampling errors associated with some of the state/territory-age-sex rate estimates.

The method used to calculate the country of birth and remoteness disaggregations will be the same as that adopted by the Disability Services Working Group for calculation of special needs group indicators in the Report on Government Services 2010. This method incorporates 2006 Census data for comparing population groups.

Disaggregation data elements:

Data Element / Data Set

Data element 'Need for assistance' to be created.

Data Element / Data Set

Person—Australian state/territory identifier, code N

Data Element / Data Set

Person (address)—Australian postcode, code (Postcode datafile) {NNNN}

Data Element / Data Set

Person—sex, code N

Data Element / Data Set

Person (address)—suburb/town/locality name, text A[A(49)]

Data Element / Data Set

Person—age, total years N[NN]

Data Element / Data Set

Service provider organisation—service activity type, CSTDA support service type code N.NN

Data Element / Data Set

Person—country of birth, code (SACC 2008) NNNN

Comments: For each of the following service groups:

1. Disability services funded by state/territory governments (excludes employment services)

2. Disability services funded by the Australian Government (employment services only) (service types 5.01, 5.02 and 5.04)

3. All disability services

The following disaggregation will be presented for service groups 1 and 3 :

- State/territory by sex (male, female, total) by age group (0–4, 5–14, 15–24, 25–34, 35–44,45–54, 55–64 years, total)

The following disaggregation will be presented for service group 2:

- State/territory by sex (male, female, total) by age group (15–24, 25–34, 35–44,45–54, 55–64 years, total)

The following disaggregations will be presented for all service groups:

- Country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)
- Remoteness Area (Major Cities, Inner Regional, other, total)
- State/territory by need for assistance (activities of daily living, activities of independent living or work, education or community but not activities of daily living, total needing assistance, no need for help or supervision, level of assistance not determined, total)

Rates of severe/profound core activity limitation from the SDAC will be used in the calculation of the denominator. SDAC 2003 is the latest available source for these data. Previous investigations have shown that these rates are stable over time.

Accountability attributes

Reporting requirements:	COAG - annually.
Organisation responsible for providing data:	AIHW to produce indicators Quality statements to be produced jointly by AIHW and ABS.
Accountability:	Overall—shared; employment services—AG; Accommodation, respite, community support (includes management and individual service planning), community access services—state and territory governments.
Further data development / collection required:	Once data are available from SDAC 2009, the AIHW will investigate the possibility of using state/territory-age-sex rates of severe/profound core activity limitation for the calculation of the potential population. Classifications proposed above are appropriate for the current CSTDA/DS NMDS. Classifications will need to be reviewed in line with any future changes to the NMDS.

Other issues caveats: Available disaggregation depends on sampling errors and other caveats. Cells with numerator counts less than 5 will be suppressed.

For service groups 1 and 3, people with age reported in the range 0 to 64 years and people with 'not stated' age are included in calculations for this indicator. For service group 2, people with age reported in the range 15 to 64 years only are included in calculations. People with age reported to be 65 years or older are not included.

Treatment of 'not stated' values within disaggregations (numerator only):

For service groups 1 and 3:

- Age group: Subtotal includes people with known age only. Total includes people with 'not stated' age.

For service group 2:

- Age group: Only people with known age will be included.

For all service groups:

- Sex: Subtotal includes people with known sex only. Total includes people with 'not stated' sex.
- Country of birth: Other English speaking countries is the subtotal of Australia and other English speaking countries. Subtotal includes people with known country of birth only. Total includes people with 'not stated' country of birth.
- Remoteness: 'Other' includes Outer Regional, Remote and Very Remote. Subtotal includes people with known remoteness only. Total includes people where remoteness area cannot be determined.
- Need for assistance: Total needing assistance includes need for assistance in activities of daily living, activities of independent living and activities of work, education or community. Total includes service users with level of assistance not determined.
