National Healthcare Agreement: P10-Breast cancer screening rates, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	Breast cancer screening rates, 2010
METEOR identifier:	394267
Registration status:	Health! , Superseded 08/06/2011
Description:	Screening rates for breast cancer for women within the national target age group.
Indicator set:	National Healthcare Agreement (2010) Health! , Superseded 08/06/2011
Outcome area:	Prevention Health! , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P10-Breast cancer screening rates, 2010 QS Health! , Superseded 08/06/2011

Collection and usage attributes

Population group age from:	Women aged 50 years
Population group age to:	Women aged 69 years
Computation description:	Rates are directly age-standardised to the Australian population as at 30 June 2001, expressed 100 people.
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of women aged 50-69 years who have been screened for breast cancer in a 2 year period.

Numerator data elements:

Data Element / Data Set

Person—age

Accountability attributes

- Reporting requirements:** National Healthcare Agreement
- Organisation responsible for providing data:** Australian Institute of Health and Welfare
- Further data development / collection required:** Specification: Long-term
The quality of Indigenous identification needs to be assessed.
- Other issues caveats:** Remoteness area and SEIFA of residence are based on residential address at the time of screening.
- Disaggregation by Indigenous status, remoteness area and SEIFA of residence within individual states/territories is subject to data quality considerations.
- Recommendations from the current Evaluation of BreastScreen Australia may result in changes to how participation is reported in the future as well as identifying any data development required.
