# National Indigenous Reform Agreement: P26a- Proportion of Indigenous 18-24 year olds engaged in full-time employment, education or training at or above Certificate III (Census data), 2010 QS

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Quality Statement
<b>METEOR identifier:</b>	396324
<b>Registration status:</b>	<a href="#">Community Services (retired)</a> , Superseded 04/04/2011

## Data quality

<b>Institutional environment:</b>	For information on the institutional environment of the Australian Bureau of Statistics (ABS), including the legislative obligations of the ABS, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see the ABS Institutional Environment.
<b>Timeliness:</b>	The <i>Census and Statistics Act 1905</i> requires the Australian Statistician to conduct a Census on a regular basis. Since 1961 it has been conducted every five years. The 2006 Census was the 15th national Census for Australia and was held on 8 August 2006. For the 2006 Census, first release data was available on the ABS website on 27 June 2007, and second release data on 25 October 2007.
<b>Accessibility:</b>	An extensive range of 2006 Census data is freely available from the ABS website and accessible from publications or electronic products. See Census Products for the full range. For complex and specialised requests that cannot be sourced freely online, the ABS Information Consultancy Service can provide data on a fee for service basis.
<b>Interpretability:</b>	To aid interpretation of Census data, a comprehensive range of reference material and information is available under Census on the ABS website.
<b>Relevance:</b>	<p>The Census collects information on labour force status and participation in education or training. While type of educational institution is collected, level of education of current study is not.</p> <p>Therefore, Census data for this measure includes all people aged 20–24 years who are studying full time, irrespective of the level of education at which they are studying.</p> <p>In the Census, information may have been supplied by one household resident on behalf of another person. The person reporting may not know all details of the participation of the other in employment or education. In other cases, the answer to a question is not supplied. Hence, judgement may be required in classifying people for this measure.</p>

**Accuracy:**

There are four principal sources of error in Census data: respondent error, processing error, partial response and undercount. Results from the post-enumeration survey reveal an undercount of the Indigenous population. This undercount may introduce bias into the results which may affect comparability of estimates among jurisdictions. The net undercount for all Indigenous Australians was estimated at 11.5 per cent, calculated as the difference between the Census count of Indigenous people and the estimated Indigenous population on Census night (note that people who were counted in the Census but whose Indigenous status was not stated are included in estimates of net undercount). Estimates of the Indigenous net undercount for all jurisdictions are included below:

Estimated Indigenous net undercount by state/territory

Undercount rate %

NSW 8.6

Vic. 9.4

Qld 11.6

SA 8.6

WA 16.6

Tas. 8.8

NT 16.0

ACT 8.8

Source: ABS 2008 (Cat no. 3238.0.55.001).

The quality of information on qualifications is also affected by the level of detail provided and the ease with which responses can be coded. Quality statements for the data items are available, which include further information on non-response, see particularly: Type of Educational Institution Attended, Non-School Qualification, and Indigenous Status.

**Coherence:**

The Australian Standard Classification of Education (ASCED) has been used in all surveys with education items since 2001 and allows the education and training items between different surveys to be compared.
