National Indigenous Reform Agreement: P05- Average daily alcohol consumption and associated risk levels; rates of alcohol consumption at long-term risky to high risk levels, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Average daily alcohol consumption and associated risk levels; rates of alcohol consumption at long-term risky to high risk levels, 2010
METEOR identifier:	396434
Registration status:	Community Services (retired) , Superseded 04/04/2011
Description:	Proportion of Australians who consume alcohol at risky/high risk levels, by Indigenous status.
Rationale:	Excessive alcohol consumption is a major risk factor that contributes to ill health. Of those who drink, Indigenous Australians are more likely to consume alcohol at risky/high risk levels. Reducing the rate at which Indigenous Australians to drink at hazardous levels will assist in closing the gap in life expectancy.
Indicator set:	National Indigenous Reform Agreement (2010) Community Services (retired) , Superseded 04/04/2011
Outcome area:	Indigenous people remain healthy and free of preventable disease Indigenous , Standard 21/07/2010
Data quality statement:	National Indigenous Reform Agreement: P05-Average daily alcohol consumption and associated risk levels; rates of alcohol consumption at long term risky to high risk levels, 2010 QS Community Services (retired) , Superseded 04/04/2011

Collection and usage attributes

Population group age from:	18 years
Computation description:	Presentation: Number and percentage (crude and age standardised), rate ratios and rate difference, including confidence intervals and relative standard errors for percentages.
Computation:	100 x (Numerator ÷ Denominator)
Numerator:	People aged 18 years or over assessed as having risky or high-risk alcohol consumption.
Numerator data elements:	Data Element / Data Set

Accountability attributes

Organisation responsible for providing data:

In the provision of data and quality statement the Australian Bureau of Statistics (ABS) will have regard the data quality assessments in the Aboriginal and Torres Strait Islander Health Performance Framework (HPF) that are relevant to this indicator.

Further data development / collection required:

Specification: Long-term

The National Health and Medical Research Council (NHMRC) have developed new guidelines on 'risky' and 'high risk' alcohol consumption.

Mechanisms for reporting annually in between surveys could be explored.

Reliable data on Indigenous adolescents would be useful.

Other issues caveats:

Risky and high/risk alcohol consumption based on estimated average daily consumption.

This performance indicator has COAG two outcomes areas: 'Indigenous people remain healthy and free from preventable disease' and 'Alcohol and drug abuse among Indigenous people is overcome'.
