National Indigenous Reform Agreement: P08-Access to health care compared to need, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Access to health care compared to need, 2010
METEOR identifier:	396666
Registration status:	Community Services (retired) , Superseded 04/04/2011
Description:	Proportion of Australians who accessed health care by type of service and Indigenous Status; Indigenous Australian's level of need for a health care service by type of service.
Rationale:	Comparing the rates of health service use and access to the need of Indigenous Australians will help to monitor unmet need and identify areas for improvement.
Indicator set:	National Indigenous Reform Agreement (2010) Community Services (retired) , Superseded 04/04/2011
Outcome area:	Indigenous people have ready access to suitable and culturally inclusive primary health and preventative services Community Services (retired) , Standard 21/07/2010 Indigenous , Standard 11/09/2012
Data quality statement:	National Indigenous Reform Agreement: P08-Access to healthcare compared to need, 2010 QS Community Services (retired) , Superseded 04/04/2011

Collection and usage attributes

Population group age from:	15 years of age, except those who visited dentists or dental professional: from 2 years of age
Computation description:	<p>Presentation: Percentage (crude and age standardised), rate ratios and rate differences including confidence intervals and relative standard errors for percentages.</p> <p>The service types to be reported are admitted hospitalisations, casualty/outpatients GP and/or specialist doctor consultations, consultations with other health professional and dental consultation.</p> <p>For the service type 'admitted hospitalisations', access is recorded based on the last 12 months. For all other services, access is recorded based on the last 2 weeks.</p> <p>Categories of reasons why did not access services in the last 12 months are: cost, too busy, dislikes, waiting time too long or not available at time required, decided not to seek care, transport/distance, not available in area, felt it would be inadequate, discrimination/not culturally appropriate/language problems, other not further defined.</p> <p>Additional data are presented by health status. Categories of self-assessed health status are excellent, very good, good, fair and poor. These should be combined into two categories for reporting: excellent/very good/good and fair/poor.</p>
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	<p>Measure (1a): Number of people aged 15 years and over who accessed a particular health services in the past 12 months (for hospital admissions) or 2 weeks (for other health services)</p> <p>Measure (1b): Number of persons who needed to access health care but did not</p>

Accountability attributes

Organisation responsible for providing data: In the provision of data and quality statement the Australian Bureau of Statistics (ABS) will have regard to the data quality assessments in the Aboriginal and Torres Strait Islander Health Performance Framework (HPF) that are relevant to this indicator.

Further data development / collection required: Specification: Interim

This indicator requires definitional work on service access and the much more difficult concept of need.

Other issues caveats:

The indicator specified in the 2008 Aboriginal and Torres Strait Islander Health Performance Framework can be used for this indicator until data development work is completed for this indicator. See (Indicator 3.12) for more details.

<http://www.aihw.gov.au/publications/ihw/aatsihpf08r-da/aatsihpf08r-c03-12.pdf>.

This performance indicator has two outcome areas: 'Indigenous Australians achieve health outcomes comparable to the general population' and 'Indigenous people have ready access to suitable and culturally inclusive primary health and preventative services'.
