Data element attributes

Collection and usage attributes

Guide for use:	<p>The geographical location is reported using a seven digit numerical code. The first digit is the single-digit code to indicate State or Territory. The remaining six digits are the numerical code for the Collection District (CD) within the State or Territory.</p> <p>The single digit codes for the states and territories and the six digit codes for the CDs are as defined in the Australian Standard Geographical Classification (ASGC).</p> <p>The ASGC is updated on an annual basis with a date of effect of 1 July each year. The codes for CDs are unique within each State and Territory, but not within the whole country. Thus, to define a unique location, the code of the State or Territory is required in addition to the code for the CD.</p>
