| <b>Scope:</b>               | These data elements are used in conjunction with each other to describe the number of planned and unplanned transfers between prison and a community-based hospital during the National Prisoner Health Census period. |

## Collection and usage attributes

**Guide for use:** The Hospital transfer cluster comprises two data elements that allow data on the number and type (planned/unplanned) of transfers between prison and a community-based hospital during the National Prisoner Health Census period to be determined.

This is achieved by the combination of the two data elements: *Establishment (prison)—planned hospital transfer indicator, yes/no code N* and *Establishment (prison)—number of hospital transfers, number N[NN]*.
