Data element concept:	Person—area of usual residence
METEOR identifier:	269542
Registration status:	Health! , Standard 01/03/2005 Community Services (retired) , Standard 21/05/2010 Early Childhood , Standard 21/05/2010 Independent Hospital Pricing Authority , Standard 01/11/2012 WA Health , Standard 19/03/2015 Disability , Standard 13/08/2015 Tasmanian Health , Standard 01/09/2016 Commonwealth Department of Social Services (retired) , Standard 20/06/2018
Definition:	Geographical location of usual residence of the person.
Object class:	Person
Property:	Area of usual residence

Value domain attributes

Identifying and definitional attributes

Value domain:	Geographical location CD code, (ASGC 2010) NNNNNNN
METEOR identifier:	417558
Registration status:	Health! , Standard 20/09/2010 Community Services (retired) , Superseded 21/02/2012 Early Childhood , Superseded 09/03/2012
Definition:	The ASGC (2010) code set representing geographical location at the collection district (CD) level.

Representational attributes

Classification scheme:	Australian Standard Geographical Classification 2010
Representation class:	Code
Data type:	Number
Format:	NNNNNNN

Maximum character length: 7

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: The geographical location is reported using a seven digit numerical code. The first digit is the single digit code to indicate state or territory. The remaining six digits are the numerical code for the Collection District (CD) within the state or territory.

The single digit codes for the states and territories and the six digit codes for the CDs are as defined in the Australian Standard Geographical Classification (ASGC).

The ASGC is updated on an annual basis with a date of effect of 1 July each year. The codes for CDs are unique within each state and territory, but not within the whole country. Thus, to define a unique location, the code for the state or territory is required in addition to the code for the CD.

Collection methods: When collecting the geographical location of a person's usual place of residence, the Australian Bureau of Statistics (ABS) recommends that 'usual' be defined as: 'the place where the person has or intends to live for 6 months or more, or the place that the person regards as their main residence, or where the person has no other residence, the place they currently reside.' Apart from collecting a person's usual place of residence there is also a need in some collections to collect area of residence immediately prior to or after assistance is provided, or at some other point in time.

[Early Childhood](#), Superseded 09/03/2012

Implementation start date: 01/07/2011

DSS specific information:

Should be reported for the usual residence of the child's parent or guardian.

Collection District should be coded based on the full address of the child, including street number, street name, suburb/town locality name and state/territory identifier to obtain the most accurate coding.
