National Healthcare Agreement: PI 19-Infant and young child mortality rate, 2011

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Progress measure

Short name: PI 19-Infant and young child mortality rate, 2011

METEOR identifier: 421655

Registration status: Health!, Superseded 30/10/2011

Description: Mortality rates for infants and children aged less than 5 years.

Indicator set: National Healthcare Agreement (2011)

Health!, Superseded 31/10/2011

Outcome area: Primary and Community Health

Health!, Standard 07/07/2010

Data quality statement: National Healthcare Agreement: PI 19-Infant and young child mortality rate, 2011

QS

Health!, Superseded 04/12/2012

Collection and usage attributes

Population group age

from:

This indicator uses a number of different population group age lower bounds:

- For infants: Less than 1 year of age
- For children aged 1-4 years: 1 year of age
- For children aged 0-4 years: Less than 1 year of age

Population group age to:

This indicator uses a number of different population group age upper bounds:

- For infants: Less than 1 year of age
- For children aged 1-4 years: Less than 5 years of age
- For children aged 0-4 years: Less than 5 years of age

Computation: Infants (<1 year old): 1,000 x (Numerator ÷ Denominator)

<u>Children (1–4 year olds)</u>: 100,000 x (Numerator ÷ Denominator) <u>Children (0–4 year olds)</u>: 100,000 x (Numerator ÷ Denominator)

Calculated separately for each of the three age groups, and for all Australians, Indigenous and non-Indigenous Australians.

Presented as:

- Number of deaths per 1,000 live births (infant)
- Number of deaths per 100,000 population (child).

Numerator: • Number of deaths among infants (aged < 1 year)

- Number of deaths among children aged 1-4 years
- Number of deaths among children aged 0-4 years

Numerator data elements:

-Data Element / Data Set-

Person—age, total years N[NN]

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Denominator:

- · Number of live births; and
- Population aged 1-4 years; and
- Population aged 0-4 years

Denominator data elements:

Data Element / Data Set-

Person—estimated resident population of Australia

Data Source

ABS Estimated resident population (total population)

Guide for use

Data source type: Census-based plus administrative by-product data Used for the denominator for the mortality rate for children aged 1-4 years, and as a component of the denominator for the mortality rate for children aged 0-4 years.

Data Element / Data Set-

Person—estimated resident population of Australia

Data Source

ABS Indigenous experimental estimates and projections (2001 Censusbased)

Guide for use

Data source type: Census-based plus administrative by-product data Used for the denominator for the mortality rate for Indigenous children aged 1-4 years, and as a component of the denominator for the mortality rate for Indigenous children aged 0-4 years.

Data Element / Data Set-

Person—estimated resident population of Australia

Data Source

ABS Census of Population and Housing Post-Enumeration Survey

Guide for use

Data source type: Census-based plus administrative by-product data

Data Element / Data Set-

Birth—birth status, code N

Data Source

ABS birth registration data

Guide for use

Data source type: Administrative by-product data
Used as the main component of the denominator for the infant mortality rate.
Include live births only, i.e. value = 1.

Disaggregation:

2006–2008 and 2007–2009 — State and territory (total population)

 $2003-2007,\,2004-2008$ and 2005-2009 — State and territory, by Indigenous status

2007, 2008, 2009 — Nationally (infants and 0–4 years)

Disaggregations by individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication. Disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable.

Disaggregation data elements:

-Data Element / Data Set-

Person—Indigenous status, code N

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Data Element / Data Set

Person—age, total years N[NN]

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Data Element / Data Set-

Person—area of usual residence, geographical location code (ASGC 2006) NNNNN

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Used for disaggregation by state/territory

Comments:

Because of small numbers of deaths each year data are presented in 3 (total population) or 5-year (Indigenous population) groupings (state and territory only).

Single year data will be reported for time series analysis (national level only for infant and child (0–4 years).

For further detailed analysis by Indigenous status see the National Indigenous Reform Agreement (NIRA) report.

Further details (including data for 2002–06) available from the Aboriginal and Torres Strait Islander Health Performance Framework (Indicator 1.19). http://www.aihw.gov.au/publications/ihw/aatsihpf08r-da/atsihpf08r-c01-23.pdf

Most recent data available for 2011 CRC report:

2008 and 2009 (released Nov 2010)

2006-2008 and 2007-2009 (Total population).

2003–2007 (updated for national total with only 5 jurisdictions), 2004–2008 and 2005–2009 (Indigenous status).

Single year data (2007, 2008, 2009) will be reported for time series analyses for total population (national level, and for infant and children 0–4 years only).
