Person with cancer—myometrial thickness, total millimetres N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Myometrial thickness
METEOR identifier:	424269
Registration status:	Health! , Standard 08/05/2014
Definition:	The total myometrial thickness for a person with endometrial cancer, expressed in millimetres.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person with cancer—myometrial thickness
METEOR identifier:	545254
Registration status:	Health! , Standard 08/05/2014
Definition:	The total myometrial thickness for a person with endometrial cancer.
Object class:	Person with cancer
Property:	Myometrial thickness

Source and reference attributes

Submitting organisation:	Cancer Australia
---------------------------------	------------------

Value domain attributes

Identifying and definitional attributes

Value domain:	Total millimetres N[N]
METEOR identifier:	430280
Registration status:	Health! , Standard 08/05/2014
Definition:	Total number of millimetres.

Representational attributes

Representation class:	Total								
Data type:	Number								
Format:	N[N]								
Maximum character length:	2								
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>97</td><td>Not applicable</td></tr><tr><td>98</td><td>Unknown</td></tr><tr><td>99</td><td>Not stated/inadequately described</td></tr></tbody></table>	Value	Meaning	97	Not applicable	98	Unknown	99	Not stated/inadequately described
Value	Meaning								
97	Not applicable								
98	Unknown								
99	Not stated/inadequately described								
Unit of measure:	Millimetre (mm)								

Collection and usage attributes

Guide for use: Size in millimetres with valid values from 1 to 96.

Source and reference attributes

Submitting organisation: Cancer Australia

Data element attributes

Collection and usage attributes

Guide for use: Record the total myometrial thickness in millimetres (mm).

Depth of myometrial invasion is a prognostic factor for endometrial cancer. Myometrial thickness ranges from 2 to 40 mm. A myometrial thickness of 5 mm or less is considered to be normal.

The fractional myometrial invasion by tumour cells, i.e. the ratio of myometrial invasive depth to total normal myometrial thickness, is predictive of lymph node metastases in high risk endometrial cancers.
