Cancer treatment—treatment complication type, gynaecological cancer-related radiotherapy code N

Identifying and definitional attributes

| | |
|------------------------------|--|
| Metadata item type: | Data Element |
| Short name: | Radiotherapy treatment complication type |
| METEOR identifier: | 424314 |
| Registration status: | HealthI , Standard 08/05/2014 |
| Definition: | The type (or types) of treatment complication occurring within 30 days of radiotherapy for women with gynaecological cancer, as represented by a code. |
| Context: | For monitoring side effects of radiotherapy in 30 days post-treatment. |
| Data Element Concept: | Cancer treatment—treatment complication type |
| Value Domain: | Gynaecological cancer-related radiotherapy complication type code N |

Value domain attributes

Representational attributes

| | |
|----------------------------------|--------|
| Representation class: | Code |
| Data type: | Number |
| Format: | N |
| Maximum character length: | 1 |

| | Value | Meaning |
|------------------------------|--------------|-------------------------------------|
| Permissible values: | 1 | Bowel obstruction requiring surgery |
| | 2 | Fistula requiring stoma formation |
| | 3 | Pelvic insufficiency |
| | 8 | Other |
| Supplementary values: | 9 | Not stated/inadequately described |

Source and reference attributes

| | |
|---------------------------------|---------------------------|
| Submitting organisation: | Cancer Australia |
| Reference documents: | NBOCC Working Group, 2008 |

Data element attributes

Collection and usage attributes

| | |
|-----------------------|---|
| Guide for use: | Record the code for the type/s of treatment complication /s that occur within 30 days of the primary course of radiotherapy for gynaecological cancer. This item can be recorded multiple times to account for multiple treatment complications. |
|-----------------------|---|
