Person with cancer—location of lymphovascular invasion of corpus uteri, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Corpus uteri lymphovascular invasion location
Synonymous names:	LVI of corpus uteri
METEOR identifier:	424445
Registration status:	Health! , Standard 08/05/2014
Definition:	The location of cancer cells invasion into the lymphatic and/or vascular spaces for a person with cancer of the corpus uteri, as represented by a code.
Context:	Invasion of lymphatic vascular space is a predictor of lymph node metastasis and recurrence. Collect this item for women with cancer of the corpus uteri.
Data Element Concept:	Person with cancer—location of lymphovascular invasion
Value Domain:	Lymphovascular invasion of corpus uteri code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Lymphovascular invasion present and at tumour interface
	2	Lymphovascular invasion present and within the myometrium remote to the tumour interface
	3	Lymphovascular invasion present (location unknown)
Supplementary values:	7	Not applicable-pathology specimen not obtained or no lymphovascular invasion present
	8	Unknown whether pathology specimen obtained
	9	Pathology specimen obtained but lymphovascular invasion not stated/inadequately described

Source and reference attributes

Submitting organisation: Cancer Australia

Data element attributes

Collection and usage attributes

Guide for use: Record the 1 digit code indicating the location of lymphovascular invasion of neoplastic (cancer) cells. Lymphovascular invasion of neoplastic cells, both at the interface of the tumour, with the normal myometrium and more distantly, relates partly to tumour invasive depth and partly to tumour type.

Collection methods: Collect from pathology reports or databases.

Source and reference attributes

Submitting organisation: Cancer Australia

Reference documents: RCPA (2011), Endometrial Cancer Structured Reporting Protocol (1st Edition 2011)

Relational attributes

Implementation in Data Set Specifications: [Gynaecological cancer \(clinical\) DSS](#)

[Health!](#), Superseded 14/05/2015

Conditional obligation: This data element is only to be recorded for patients with endometrial cancer, as indicated by [Person with cancer—primary site of cancer, topography code \(ICD-O-3\) ANN.N](#), and when [Person with cancer—lymphovascular invasion indicator, yes/no code N](#) indicates the presence of lymphovascular invasion.

[Gynaecological cancer \(clinical\) NBPDS](#)

[Health!](#), Standard 14/05/2015

Conditional obligation:

This data element is only to be recorded for patients with endometrial cancer, as indicated by [Person with cancer—primary site of cancer, topography code \(ICD-O-3\) ANN.N](#), and when [Person with cancer—lymphovascular invasion indicator, yes/no code N](#) indicates the presence of lymphovascular invasion.
