# Person with cancer—location of lymphovascular invasion of corpus uteri, code N

# Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Corpus uteri lymphovascular invasion location

**Synonymous names:** LVI of corpus uteri

METEOR identifier: 424445

Registration status: Health!, Standard 08/05/2014

**Definition:** The location of cancer cells invasion into the lymphatic and/or vascular spaces for a

person with cancer of the corpus uteri, as represented by a code.

Context: Invasion of lymphatic vascular space is a predictor of lymph node metastasis and

recurrence. Collect this item for women with cancer of the corpus uteri.

# Data element concept attributes

## Identifying and definitional attributes

**Data element concept:** Person with cancer—location of lymphovascular invasion

METEOR identifier: 545103

Registration status: Health!, Standard 08/05/2014

**Definition:** The location of cancer cells invasion into the blood vessels and/or lymphatic system

in a person with cancer.

Object class: Person with cancer

Property: Location of lymphovascular invasion

#### Value domain attributes

#### Identifying and definitional attributes

Value domain: Lymphovascular invasion of corpus uteri code N

Synonymous names: LVI code - corpus uteri

METEOR identifier: 424443

**Registration status:** <u>Health!</u>, Standard 08/05/2014

**Definition:** A code set representing the location of tumour invasion into the lymphatic and/or

vascular space for patients with cancer of the corpus uteri.

# Representational attributes

Representation class: Code

Data type: Number

Format: N
Maximum character length: 1

Value Meaning

Permissible values: 1 Lymphovascular invasion present and at tumour

interface

	2	Lymphovascular invasion present and within the myometrium remote to the tumour interface
	3	Lymphovascular invasion present (location unknown)
Supplementary values:	7	Not applicable-pathology specimen not obtained or no lymphovascular invasion present
	8	Unknown whether pathology specimen obtained
	9	Pathology specimen obtained but lymphovascular invasion not stated/inadequately described

#### Source and reference attributes

**Submitting organisation:** Cancer Australia

#### Data element attributes

## Collection and usage attributes

Guide for use: Record the 1 digit code indicating the location of lymphovascular invasion

> of neoplastic (cancer) cells, Lymphovascular invasion of neoplastic cells, both at the interface of the tumour, with the normal myometrium and more distantly, relates

partly to tumour invasive depth and partly to tumour type.

**Collection methods:** Collect from pathology reports or databases.

#### Source and reference attributes

**Submitting organisation:** Cancer Australia

Reference documents: RCPA (2011), Endometrial Cancer Structured Reporting Protocol (1st Edition

2011)

#### Relational attributes

Specifications:

Implementation in Data Set Gynaecological cancer (clinical) DSS Health!. Superseded 14/05/2015

> Conditional obligation: This data element is only to be recorded for patients with endometrial cancer, as indicated by Person with cancer—primary site of cancer,

topography code (ICD-O-3) ANN.N, and when Person with cancer—

lymphovascular invasion indicator, yes/no code N indicates the presence of

lymphovascular invasion.

Gynaecological cancer (clinical) NBPDS Health!, Standard 14/05/2015

Conditional obligation:

This data element is only to be recorded for patients with endometrial cancer, as indicated by Person with cancer—primary site of cancer, topography code (ICD-O-3) ANN.N, and when Person with cancer—lymphovascular invasion indicator, ves/no code N indicates the presence of lymphovascular invasion.
