National Healthcare Agreement: PB 07-By 2014-15, improve the provision of primary care and reduce the proportion of potentially preventable hospital admissions by 7.6 per cent over the 2006-07 baseline to 8.5 per cent of total hospital admissions, 2011

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PB 07-By 2014-15, improve the provision of primary care and reduce the proportion of potentially preventable hospital admissions by 7.6 per cent over the 2006-07 baseline to 8.5 per cent of total hospital admissions, 2011
METEOR identifier:	429180
Registration status:	Health! , Superseded 30/10/2011
Description:	<p>By 2014–15, improve the provision of primary care and reduce the proportion of potentially preventable hospital admissions by 7.6 per cent over the 2006–07 baseline to 8.5 per cent of total hospital admissions (Baseline specification).</p> <p>There are two parts to this performance benchmark:</p> <ol style="list-style-type: none">1. Improved provision of primary care2. Reduced potentially preventable primary care <p>For Part 1, the measure is under development. For Part 2, the measure is defined below.</p>
Indicator set:	National Healthcare Agreement (2011) Health! , Superseded 31/10/2011
Outcome area:	Primary and Community Health Health! , Standard 07/07/2010

Collection and usage attributes

Computation description:	Presented as a number and a percentage
Computation:	Number $100 \times (\text{Numerator} \div \text{Denominator})$ Calculated separately for each of the 3 subcategories, and as a single measure
Numerator:	Number of potentially preventable hospitalisations, divided into three groups and total: <ul style="list-style-type: none">• vaccine-preventable conditions (e.g. tetanus, measles, mumps, rubella)• potentially preventable acute conditions (e.g. ear, nose and throat infections, dehydration/gastroenteritis)• potentially preventable chronic conditions (e.g. diabetes, asthma, angina, hypertension, congestive heart failure and chronic obstructive pulmonary disease)• all potentially preventable hospitalisations

Numerator data elements:

Disaggregation:

State and territory (by categories and total)

Nationally by:

- SEIFA Index of Relative Socio-economic Disadvantage (IRSD) deciles

Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication. National disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable.

Disaggregation data elements:

Data Element / Data Set

[Person—area of usual residence, geographical location code \(ASGC 2007\) NNNNN](#)

Data Source

[National Hospital Morbidity Database \(NHMD\)](#)

NMDS / DSS

[Admitted patient care NMDS 2008-09](#)

Guide for use

Data source type: Administrative by-product data
Used for disaggregation by state/territory and SEIFA IRSD

Comments: Potentially preventable hospitalisations are called 'ambulatory care sensitive hospitalisations' in some jurisdictions.

Changes in the ICD-10-AM 6th Edition (in use from July 2008) relating to the PPH categories 'Dehydration and gastroenteritis' (acute conditions) and 'Diabetes complications' (chronic conditions) have impacted the comparability of 2008–09 data with the previous reporting period.

Most recent data available for 2011 CRC report: 2008–09

Baseline: 2006–07
