Collection and usage attributes

Guide for use:

Complex addresses provide for the unique identification of secondary address sites within a larger, primary address site. A complex address requires both parts (secondary and primary) to provide unique definition.

In the case of a ranged address within a complex, this data element is used in combination with the *Address—complex road number 1, road number XXXXXX* data element to obtain the first and last numbers of the address.

Usage Example:

Biology Building B
20-24 Genetics Lane North (Complex road number 2 is 24)
Blamey Research Institute
1-131 Sunshine Rd
CAIRNS QLD 4870

This data element is one of a number of items that can be used to create a primary address, as recommended by the AS 4590-2006 Interchange of client information standard. Components of the primary address are:

Address site (or Primary Complex) name
Address number or number range
Road name (name/type/suffix)
Locality
State/Territory
Postcode (optional)
Country (if applicable).
