Cancer treatment—residual (R) tumour indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Residual tumour indicator
METEOR identifier:	430267
Registration status:	Health! , Standard 08/05/2014
Definition:	An indicator of whether residual tumour is present after the course of treatment for cancer, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Cancer treatment—residual (R) tumour indicator
METEOR identifier:	430253
Registration status:	Health! , Standard 08/05/2014
Definition:	An indicator of whether residual tumour is present or absent after the course of treatment for cancer.
Object class:	Cancer treatment
Property:	Residual (R) tumour indicator

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no code N
METEOR identifier:	270732
Registration status:	Health! , Standard 01/03/2005 Community Services (retired) , Standard 27/04/2007 Early Childhood , Standard 21/05/2010 Housing assistance , Standard 23/08/2010 Homelessness , Standard 23/08/2010 Independent Hospital Pricing Authority , Standard 01/11/2012 Indigenous , Standard 16/09/2014 Disability , Standard 07/10/2014 WA Health , Standard 19/03/2015 National Health Performance Authority (retired) , Retired 01/07/2016 Tasmanian Health , Standard 27/05/2020
Definition:	A code set representing 'yes' and 'no'.

Representational attributes

Representation class:	Code
Data type:	Boolean
Format:	N
Maximum character length:	1

Value	Meaning
-------	---------

Permissible values:	1	Yes
	2	No

Data element attributes

Collection and usage attributes

Guide for use:	Record the presence of residual tumour on completion of the course of treatment for cancer. In some cases treated with surgery and/or neoadjuvant therapy, residual tumour will be present at the primary site after treatment because of incomplete resection or local and regional disease extending beyond the scope of resection.
Collection methods:	This information should be sought from the patient's medical record, referral letters or attending medical clinician.
Comments:	The presence of residual tumour may indicate the effect of treatment, influence further treatment decisions, and be a strong predictor of prognosis.

Source and reference attributes

Submitting organisation:	Cancer Australia
