## Data element attributes

### Collection and usage attributes

**Guide for use:** CODE 1 Yes

A person is a regular client of the organisation or agency.

CODE 2 No

A person is not a regular client of the organisation or agency.

**Collection methods:** The definition of a regular client can vary depending on the context and/or collection in which the term is being applied, but generally involves a minimum number of visits to an organisation or agency or uses of a facility, occurring over a specific period of time. For example, in the primary health care context a regular client may be someone who has visited a particular primary health care provider 3 or more times in the last 2 years.

In some cases, a visit may be further defined as an attendance at the organisation or agency that leads to either the creation of a new client record or the updating of an existing client record in the client management system of the organisation or agency.

The applicable number of visits to the organisation or agency and the period of time over which those visits need to take place in order for a person to be identified as a regular client should be specified in an appropriate data set specific instruction.
