National Indigenous Reform Agreement: PI 24-CDEP participants and off-CDEP job placement, 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI 24-CDEP participants and Off CDEP job placement, 2012
METEOR identifier:	438724
Registration status:	Indigenous , Superseded 13/06/2013
Description:	<p>There are two measures for this indicator:</p> <p>Measure (1a): Number and proportion of the Indigenous population participating in The Community Development and Employment Projects program (CDEP)</p> <p>and</p> <p>Measure (1b): Proportion of CDEP participants moving into off-CDEP employment.</p>
Rationale:	CDEP participation supports labour force participation for Indigenous persons in remote areas in particular. Progress measure for closing the gap target to <i>halve the gap in employment outcomes between Indigenous and non-Indigenous Australians within a decade.</i>
Indicator set:	National Indigenous Reform Agreement (2012) Indigenous , Superseded 13/06/2013
Outcome area:	Indigenous people of working age participate effectively in all sectors and at all levels of the labour market Indigenous , Standard 21/07/2010
Data quality statement:	National Indigenous Reform Agreement: PI 24-CDEP participants and off-CDEP job placement, 2012 QS Indigenous , Superseded 13/06/2013

Collection and usage attributes

Computation description:	Presentation: Number and percentage (per 100 persons).
Computation:	100 x (Numerator ÷ Denominator).
Numerator:	Measure (1a): Total number of CDEP participants as at 30 June. Measure (1b): Total number of off-CDEP employment exits (over financial year).

Numerator data elements:

Data Element / Data Set

CDEP participation

Data Source

[CDEP Management Branch Administrative Data](#)

Guide for use

Data source type: Administrative by-product data

Data Element / Data Set

Off-CDEP employment outcomes

Data source type: Administrative by-product data

Comments:

Most recent data available for 2012 CRC report is 2010-11.

The CDEP proportion is a stock variable presented at a point-in-time in a way consistent with the ABS population estimate. The off-CDEP proportion is a flow variable presented over a time interval. Over this time interval, multiple off-CDEP employment and CDEP participation episodes can be recorded per participant. As such, the off-CDEP employment measures refer to exits and participations (vis-à-vis participants).

From 2009-10, reporting for these measures will be split into the two sub-streams of CDEP (Work-Readiness Services and Community Development) following the CDEP restructure, effective from 1 July 2009.

In the new CDEP structure beginning 1 July 2009, new participants can be part of two streams of assistance – Work-Readiness Services and Community Development. From 2009-10 the above measures will be provided for the two streams of assistance. This will be in addition to reporting the total number and proportions reported above. The rationale for this is that the policy reform may have an impact on the number of off-CDEP employment exits, possibly with proportionately more coming from the work-readiness stream. Reporting it by sub-streams will facilitate monitoring the impact of the policy change and ensure across-time comparability.

Baseline year for NIRA target (Halve the gap in employment outcomes within a decade) is 2008; baseline year for this indicator is 2008-09; target year is 2018.

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Person
Format:	N[N].N

Indicator conceptual framework

Framework and dimensions:	Socioeconomic Factors
