## Person—blood pressure measurement result recorded indicator

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 441403

**Registration status:** Health!, Standard 07/12/2011

Indigenous, Standard 13/03/2015

**Definition:** An indicator of whether a person's **blood pressure** measurement result has been

recorded.

## **Object Class attributes**

#### Identifying and definitional attributes

Object class: Person

**Definition:** A human being.

## Collection and usage attributes

**Comments:** Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human

being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are

not exclusively male or female.
