Definition: A code set representing a medium-sized area built from whole Statistical areas level 1 (SA1s). The aim of Statistical areas level 2 (SA2s) is to represent a community that interacts together socially and economically.

Representational attributes

Classification scheme: [Australian Statistical Geography Standard 2011](#)

Representation class: Code

Data type: String

Format: N(9)

Maximum character length: 9

Collection and usage attributes

Guide for use: SA2 coding structure:

An SA2 is identifiable by a 9-digit fully hierarchical code. The SA2 identifier is a 4-digit code, assigned in alphabetical order within an SA3. An SA2 code is only unique within a state/territory if it is preceded by the state/territory identifier.

For example:

State/territory	SA4	SA3	SA2
N	NN	NN	NNNN

Comments: There are 2,196 SA2 spatial units. In aggregate, they cover the whole of Australia without gaps or overlaps. Jervis Bay Territory, the Territory of the Cocos (Keeling) Islands and the Territory of Christmas Island are each represented by an SA2.
