Person—influenza immunisation indicator, yes/no code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Influenza immunisation indicator

METEOR identifier: 457688

Registration status: Health!, Standard 07/12/2011

Indigenous, Standard 13/03/2015

Definition: An indicator of whether a person is immunised against influenza, as represented by

a code.

Data Element Concept: Person—influenza immunisation indicator

Value Domain: Yes/no code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Boolean

Format: N
Maximum character length: 1

Value Meaning

Permissible values: 1 Yes

2 No

Data element attributes

Collection and usage attributes

Guide for use: CODE 1 Yes

A person is immunised against influenza.

CODE 2 No

A person is not immunised against influenza.

A person is considered to be immunised against influenza if, in the last 12 months,

they have received an immunisation approved for prevention of influenza. $\label{eq:control}$

This item is only collected for persons aged 50 years and over.

DSS specific information:

In the Indigenous primary health care DSS, an Indigenous person aged 50 years and over is recorded as immunised against influenza if they have received an influenza vaccine in the previous year.

Indigenous primary health care NBEDS 2017-18

Health!, Superseded 06/09/2018 Indigenous, Superseded 22/10/2018 Implementation start date: 01/07/2017 Implementation end date: 30/06/2018

Conditional obligation:

This item is only collected for persons aged 50 and over.

DSS specific information:

In the Indigenous primary health care NBEDS, an Indigenous person aged 50 and over is recorded as immunised against influenza if they have received an influenza vaccine in the previous year.

Indigenous primary health care NBEDS 2018-19

Health!, Superseded 12/12/2018 Indigenous, Superseded 02/04/2019 Implementation start date: 01/07/2018 Implementation end date: 30/06/2019

Conditional obligation:

This item is only collected for persons aged 50 and over.

DSS specific information:

In the Indigenous primary health care NBEDS, an Indigenous person aged 50 and over is recorded as immunised against influenza if they have received an influenza vaccine in the previous year.

Indigenous primary health care NBEDS 2019-20

<u>Health!</u>, Superseded 16/01/2020 <u>Indigenous</u>, Superseded 14/07/2021 **Implementation start date:** 01/07/2019 Implementation end date: 30/06/2020

Conditional obligation:

This item is only collected for persons aged 50 and over.

DSS specific information:

In the Indigenous primary health care NBEDS, an Indigenous person aged 50 and over is recorded as immunised against influenza if they have received an influenza vaccine in the previous year.

Indigenous primary health care NBEDS 2020-21

Health!, Retired 13/10/2021

Implementation start date: 01/07/2020 Implementation end date: 30/06/2021

Conditional obligation:

This item is only collected for persons aged 50 and over.

DSS specific information:

In the Indigenous primary health care NBEDS, an Indigenous person aged 50 and over is recorded as immunised against influenza if they have received an influenza vaccine in the previous year.

Indigenous-specific primary health care NBEDS December 2020

Indigenous, Standard 14/07/2021
Implementation start date: 01/07/2020
Implementation end date: 31/12/2020

Conditional obligation:

Reporting against this data element is conditional upon a person being:

- aged ≥ 6 months at the census date OR
- aged 15–49 at the census data and having 'CODE 02 Type 2 diabetes' response to 'Person—diabetes mellitus status, code NN' OR
- aged 15–49 at the census data and having 'CODE 1 Yes' response to 'Person—chronic obstructive pulmonary disease recorded indicator, yes/no code N'

DSS specific information:

Data are provided to the AIHW 3 times:

- 1. relating to Indigenous regular clients aged 6 months and over
- 2. relating to Indigenous regular clients aged 15–49 with type 2 diabetes
- 3. relating to Indigenous regular clients aged 15-49 with COPD.

In the ISPHC NBEDS, an Indigenous person is recorded as immunised against influenza if they have received an influenza vaccine in the previous 12 months up to the census date.

In the ISPHC NBEDS only aggregated data with CODE 1 are provided to the AIHW.
