# Person with cancer—adolescent and young adult cancer healthcare provider type, code N[N]

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	AYA cancer treatment provider type
<b>METEOR identifier:</b>	457925
<b>Registration status:</b>	<a href="#">HealthI</a> , Standard 04/02/2015
<b>Definition:</b>	The type of healthcare provider (individual, team or organisation) that is providing primary care to an adolescent or young adult with cancer, as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Person with cancer—cancer healthcare provider type</a>
<b>Value Domain:</b>	<a href="#">Adolescent and young adult cancer healthcare provider type code N[N]</a>

## Value domain attributes

### Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N[N]	
<b>Maximum character length:</b>	2	
	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Specialist adolescent or young adult with cancer centre or team
	2	Cancer centre
	3	Paediatric cancer centre
	4	General hospital
	5	General paediatric hospital
	88	Other
<b>Supplementary values:</b>	99	Unknown

### Collection and usage attributes

<b>Guide for use:</b>	Record the code that most accurately represents the healthcare provider in charge of primary treatment of an adolescent or young adult patient with cancer.  Cancer centres treat patients of all age groups with cancer, paediatric cancer centres treat cancer patients who are under 18 years of age, general hospitals treat patients of all age groups with varying healthcare requirements, and general paediatric hospitals treat patients who are under 18 years of age with varying healthcare requirements.

# Data element attributes

## Collection and usage attributes

**Guide for use:** Record the code most accurately outlining the type of healthcare provider (individual, team or organisation) that is providing primary care to an adolescent or young adult (AYA) with cancer.

If an individual has been treated by a specialist unit within a broader hospital, the unit type should be recorded. For example, if a person is treated by specialist AYA team within a paediatric hospital, this data element should be recorded as "specialist AYA centre or team", but if a person treated by a paediatric oncology team within a paediatric centre, this data element should be recorded as "paediatric cancer centre or hospital".

This item is used to determine whether a patient has been primarily cared for by a specialist AYA healthcare provider, or by a healthcare provider that primarily treats adults or children. This is important in assessing whether an individual has received care that has been tailored for their age group.

**Collection methods:** Collect from patient medical records.
