Dwelling—number of days vacant, total N[NNN]

Identifying and definitional attributes

Metadata item type: Data Element
Short name: Vacant days
METEOR identifier: 459071

Registration status: <u>Housing assistance</u>, Superseded 30/08/2017

Definition: The total number of days a dwelling is untenanted.

Data Element Concept: Dwelling—number of days vacant

Value Domain: <u>Total days N[NNN]</u>

Value domain attributes

Representational attributes

Representation class: Total

Data type: Number

Format: N[NNN]

Maximum character length: 4
Unit of measure: Day

Data element attributes

Collection and usage attributes

Guide for use: In housing assistance a vacancy episode occurs when a dwelling is untenanted, but

is available to be tenanted. The number of days in each vacancy episode is calculated by subtracting the date the dwelling was last occupied from the date the dwelling was first vacated. The vacancy start date is generally the day after the previous household has ended their tenancy, i.e. equal to <code>Dwelling—vacancy start date</code>, <code>DDMMYYYY</code> on the Household (housing assistance) cluster. The vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to <code>Dwelling—vacancy end date</code>, <code>DDMMYYYYY</code> of the previous household.
